CAREER OBJECTIVE

Recent Computer Engineering graduate, adaptive quick learner with hands-on experience in Java development and Power Apps. Proactive and eager to apply technical and analytical skills in a growth-oriented organization

EDUCATION

R C Patel Institute of Technology, Shirpur - B.Tech Computer Engineering
July 2018- July 2022 CGPA: 8.89.

R.D.M.P, Dondaicha - HSC
June 2017 - June 2018 Percentage: 77.54.

Adarsh Vidya Mandir, Nijampur - SSC
June 2015- June 2016 Percentage: 87.90.

WORK EXPERIENCE

AERIES, Mumbai— Product Engineer (Jul 23 -Oct 23)

- Worked in the finance domain to automate extraction of invoices details.
- Focused on Intelligence Process Automation and optimizing critical processes and enhancing document management functionalities.
- Leveraged Power Automate to streamline extraction of email attachments, including PDFs, Excel, and zipped files.
- Developed a flow to unzip, differentiate, and sort files by extension, saving them in SharePoint.
- Used APIs to automatically extract and store email content in SharePoint, reducing manual tasks.

R3 Systems, Nashik—*Core JAVA (Aug 22 -Feb 23)*

- Applied OOP concepts in Java, establishing robust connections to databases with JDBC.
- Executed SQL queries efficiently using JDBC methods.
- Leveraged Spring Boot for user authorization, token regeneration, and validation tasks.

PROJECTS

Token Validation Using Spring Boot Security

- Designed and developed a Java API endpoint focused on token validation using Spring Boot Security.
- Ensured secure token generation with integrated validation filters for enhanced security.

- Incorporated Swagger for API documentation and utilized Postman for rigorous endpoint testing.
- **Tech Stack**: Java, Spring Boot, JWT Security, Swagger, Postman.

Online Job Portal using Java

- Built an online job portal in Java, bridging industries with potential candidates and ensuring the right fit for both.
- Integrated web functionalities using HTML, CSS while backend processes were managed with Java connected to a MySQL database.
- Tech Stack: HTML, CSS, Java, MySQL

Portfolio

- Build an impressive online portfolio using React, featuring a fully responsive design for optimal viewing on all devices.
- The portfolio includes a skills section, a contact form for direct communication, and smooth navigation. Utilizing modern web development technologies like React, CSS, and form-handling services.
- This project provides a professional and engaging online presence for individuals aiming to highlight their expertise.
- **Tech Stack** : HTML5,CSS3,ReactJS.

SKILLS

- **Languages**: Python, JAVA, HTML5, CSS3.
- **Databases**: MySQL, SQL.
- **Programming** Skills: OOPS, DS, Algorithms.
- **Tools**: GitHub, Power Automate, Power App.

CERTIFICATION AND ACHIVEMENT

- IBM Skill Build - Learn Java
- ExcelR - Data Science

SOFT SKILLS

- Quick Learner.
- Good Communication Skills.
- Good Listener.
- Time Management.

LANGUAGES

English, Hindi, Marathi.
